

Wheel-a-Weigh[®]

LAUNCHING WHEELS FOR INFLATABLES

NOTE: This product was discontinued in 2006.

ASSEMBLY INSTRUCTIONS

This model is designed to attach to the transom hardware that exists on most hard transomed Zodiac inflatable boats. Hardware will be required for other boats.

The product is not to be used on boats over 300 lbs. (136 kg).

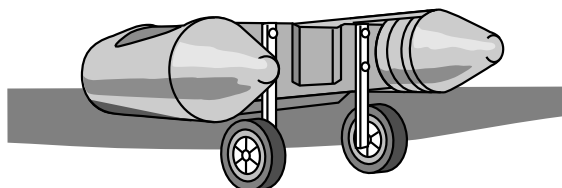

1. Inflate tires to **NO MORE THAN 14 P.S.I.** (14 pounds per square inch).

CAUTION: Gas station compressors can easily overinflate and explode tires. Be careful not to overinflate.

2. Slide inflated tires onto axle. Install nylon washer and insert locking pin.
3. Hook strut on transom bolt and insert knob assembly through hole in transom. Tighten into top threaded insert in strut to secure.
4. Remove struts after launching. Struts can be stored by securing to the inside of the transom using the knob assembly tightened into the center threaded insert in strut.

CARRYING THE BOAT

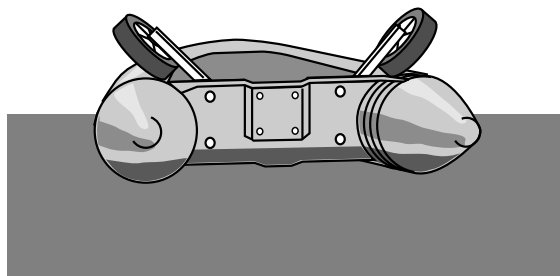

When setting the wheels to carry the boat, the knob assemblies go through the transom from the **INSIDE**, then through the struts and into the upper Nutserts.

CAUTION: This product is not designed to be towed behind a vehicle. Damage may occur and will void the warranty.

STORING THE WHEELS

For carrying the wheels inboard after launching, the knob assemblies go through the transom from the **OUTSIDE**, then through the struts and into the center Nutserts. The wheels rest on the hulls inside the boat in a "V."

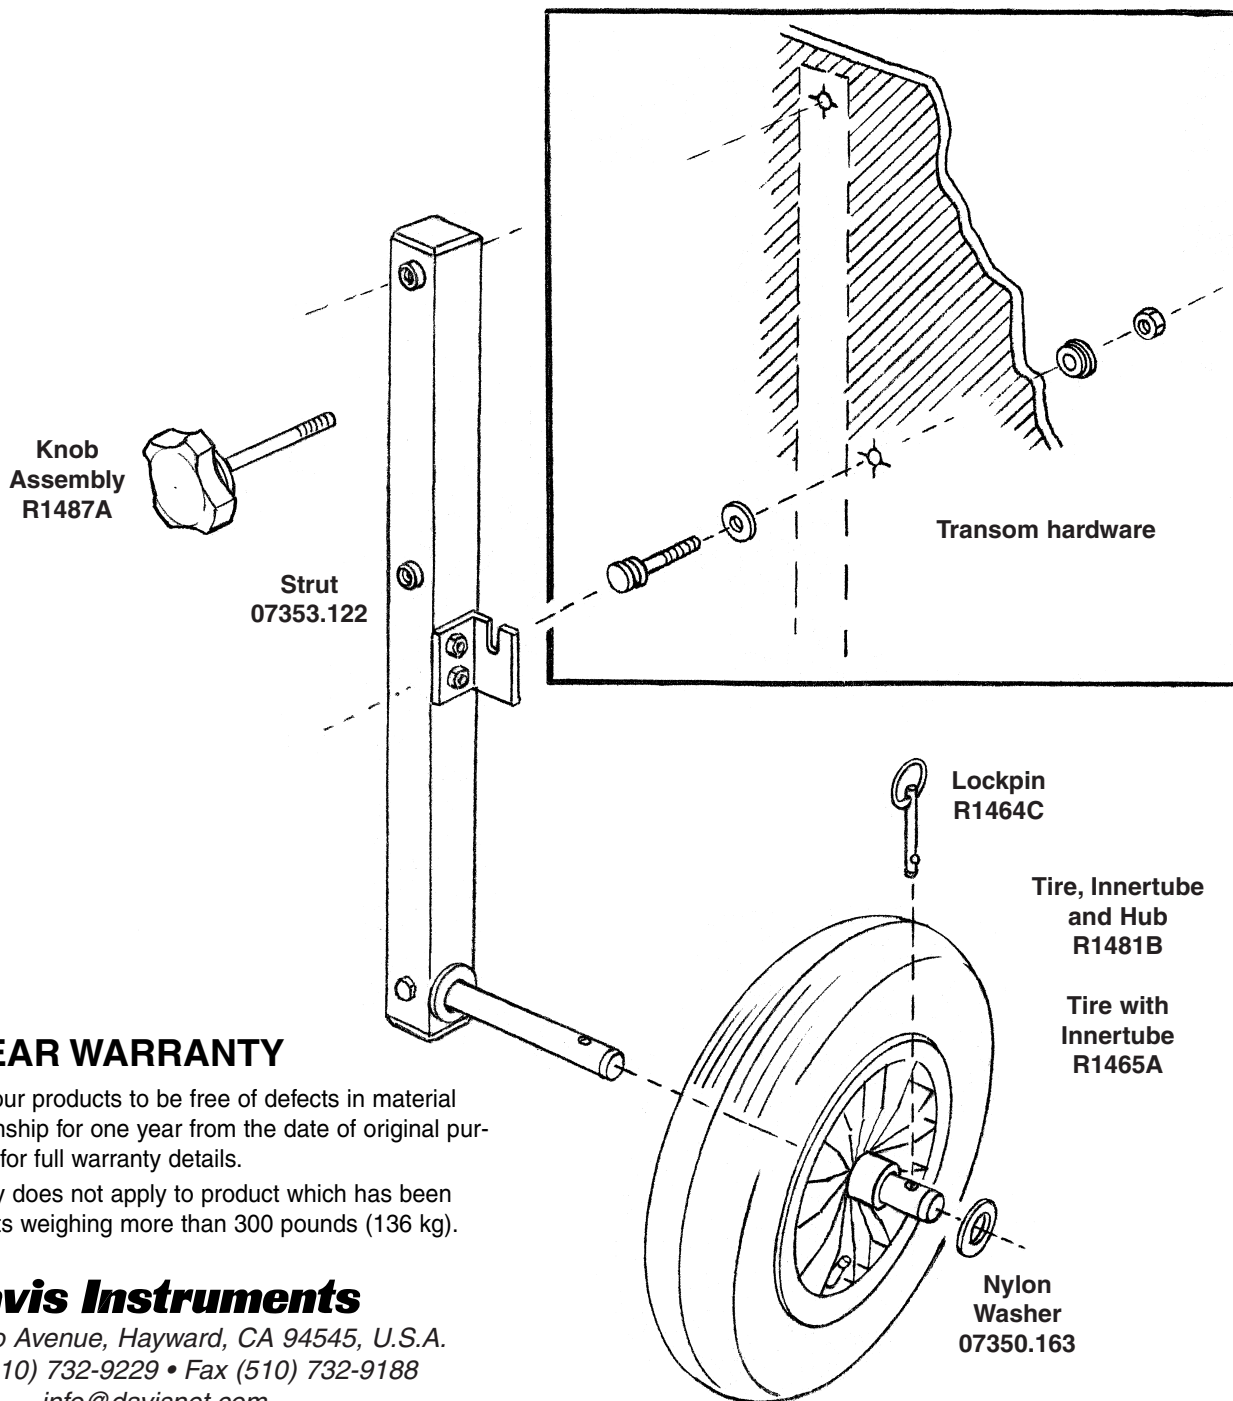

REPLACEMENT PARTS

Part No.	Description
R1465A	Tire with Innertube, 4 x 16" (10 x 41 cm)

Wheel-a-Weigh®

#1487

**Launching Wheels for
Inflatables**

ONE-YEAR WARRANTY

We warrant our products to be free of defects in material and workmanship for one year from the date of original purchase. Write for full warranty details.

This warranty does not apply to product which has been used on boats weighing more than 300 pounds (136 kg).
